

Today, there are many plans available for funding an extended care plan. Which one is right for your client will be influenced by many factors, and one of the most important is how they answer the following question. “What are you solving for? Is long-term care the priority, asset preservation or a death benefit?”

The chart below was designed to help you identify the best solution based on how your client answers this question. Plans are presented as a continuum, starting with a pure long-term care solution on the left and expanding to include asset preservation and death benefit needs as you move to the right.

	<b>Traditional LTC Insurance</b>	<b>Linked Benefit Life Insurance (or Annuity) with LTC Extension of Benefits</b>	<b>Life Insurance (or Annuity) with LTC Rider</b>	<b>Life Insurance with a separate premium Chronic Illness Rider</b>	<b>Life Insurance with a no-charge Chronic Illness Rider</b>
<b>Structure of Coverage</b>	A tax-qualified LTC insurance contract designed solely to pay for defined long-term care services.	A base life insurance (or annuity) policy that accelerates the DB (or CV) for tax-qualified LTC with an additional LTC extension of benefits.	Life insurance with a separate tax-qualified LTC rider that only accelerates the death benefit (DB) or a defined percentage of the DB.	Life insurance with a separate Chronic Illness rider that only accelerates the death benefit (DB) or a defined percentage of the DB for a policy-defined “chronic illness.”	Life insurance with a built-in (no premium) Chronic Illness rider that allows for a limited portion of the death benefit (DB) to be accelerated for a policy-defined “chronic illness.”

	<b>Traditional LTC Insurance</b>	<b>Linked Benefit Life Insurance (or Annuity) with LTC Extension of Benefits</b>	<b>Life Insurance (or Annuity) with LTC Rider</b>	<b>Life Insurance with a separate premium Chronic Illness Rider</b>	<b>Life Insurance with a no-charge Chronic Illness Rider</b>
<b>Qualification for LTC Benefits</b>	<p>Follows strict state LTC insurance and federal HIPAA (7702B) tax-qualified LTC regulations:</p> <ul style="list-style-type: none"> <li>• At least “stand-by” assistance with 2 of 6 physical ADLs expected to last at least 90 days; or</li> <li>• “Substantial” supervision for a “severe” cognitive impairment.</li> </ul> <p>Benefit payments begin after benefit eligibility and after satisfaction of an Elimination Period.</p>	<p>Follows strict state LTC insurance and federal HIPAA (7702B) tax-qualified LTC regulations:</p> <ul style="list-style-type: none"> <li>• At least “stand-by” assistance with 2 of 6 physical ADLs expected to last at least 90 days; or</li> <li>• “Substantial” supervision for a “severe” cognitive impairment.</li> </ul> <p>Benefit payments begin after benefit eligibility and after satisfaction of an Elimination Period.</p>	<p>Follows strict state LTC insurance and federal HIPAA (7702B) tax-qualified LTC regulations:</p> <ul style="list-style-type: none"> <li>• At least “stand-by” assistance with 2 of 6 physical ADLs expected to last at least 90 days; or</li> <li>• “Substantial” supervision for a “severe” cognitive impairment.</li> </ul> <p>Benefit payments begin after benefit eligibility and after satisfaction of an Elimination Period.</p>	<p>No explicit state or federal standards. Definition of “Chronic Illness” determined by the carrier/contract language.</p> <p>May follow the exact HIPAA (7702B) language.</p> <p>May drop 90-day ADL requirement and/or the “substantial” supervision and “severe” terms from the cognitive impairment definition.</p> <p>Benefit payments begin after benefit eligibility and after satisfaction of an Elimination Period</p>	<p>No explicit state or federal standards. Definition of “Chronic Illness” determined by the carrier/contract. Could vary as follows.</p> <ul style="list-style-type: none"> <li>• Follow the exact HIPAA (7702B) language.</li> <li>• Require ADL loss and/or cognitive impairment be “permanent”;</li> <li>• Drop 90-day ADL requirement and “substantial” supervision and “severe” terms from cognitive impairment</li> <li>• Cover a physical ADL loss only</li> <li>• Pay if in facility only</li> </ul> <p>Benefit payments begin after benefit eligibility and after satisfaction of an Elimination Period.</p>

	<b>Traditional LTC Insurance</b>	<b>Linked Benefit Life Insurance (or Annuity) with LTC Extension of Benefits</b>	<b>Life Insurance (or Annuity) with LTC Rider</b>	<b>Life Insurance with a separate premium Chronic Illness Rider</b>	<b>Life Insurance with a no-charge Chronic Illness Rider</b>
<b>Benefit Payments</b>	<p>LTC Benefit Amount, Benefit Period (total benefits), inflation increases, and Elimination Period, chosen at time of issue.</p> <p>No death benefit or cash value if LTC is not used, but a "Return of Premium" rider is commonly available that creates a type of DB.</p> <p>Benefit Periods commonly range from 2 to 6 years though may go longer, including lifetime.</p> <p>Optional automatic inflation increases available.</p>	<p>LTC Benefit Amount, Benefit Period (total benefits), and inflation increases can be chosen at time of issue OR determined as a function of both premium and the amount of the base DB (or annuity CV).</p> <p>DB (or CV) not accelerated for LTC remains payable at death.</p> <p>There are two LTC phases:</p> <ol style="list-style-type: none"> <li>1. Acceleration of base DB (or CV) on a monthly basis – typically over 2-3 years.</li> <li>2. LTC Extension of Benefits</li> </ol>	<p>Amount of total death benefit accelerated for LTC set by rider – policyholder may be able to choose total DB accelerated from 100% to 50%.</p> <p>DB not accelerated for LTC remains payable at death.</p> <p>The more DB accelerated for LTC, the higher the LTC rider premium.</p> <p>LTC Benefit Amount set by rider is typically 2% to 4% per month of total LTC acceleration. Policyholder may be able to choose the percent.</p>	<p>Amount of total death benefit accelerated for Chronic Illness is set by rider – the policyholder may be able to choose the total DB accelerated from 100% to 50%.</p> <p>DB not accelerated for CI remains payable at death.</p> <p>More DB accelerated for CI, higher CI rider premium.</p> <p>CI Benefit Amount is set by rider and typically 2% to 4% per month of total CI acceleration – policyholder may be able to choose percent.</p>	<p><b><u>Discounted Method:</u></b></p> <p>Death benefit "actuarially discounted" at time of acceleration based on such factors as attained age, expected mortality, type and degree of impairment, gender, rate class, cash value and discount interest rate.</p> <p>The amount accelerated will be significantly less than full DB.</p> <p>Acceleration of death benefit not paid as a CI benefit is forfeited.</p> <p><b><u>Lien Method:</u></b></p> <p>A portion of DB can be accelerated in form of a lien against the policy after diagnosis of CI.</p>

	<b>Traditional LTC Insurance</b>	<b>Linked Benefit Life Insurance (or Annuity) with LTC Extension of Benefits</b>	<b>Life Insurance (or Annuity) with LTC Rider</b>	<b>Life Insurance with a separate premium Chronic Illness Rider</b>	<b>Life Insurance with a no-charge Chronic Illness Rider</b>
	<p>Elimination Period chosen by policyholder at issue – 30, 60, 90, 180, or 365 days. A 0-day EP for home care is a common option or built-in.</p>	<p>(EOB) continues monthly LTC payout after DB (or CV) exhausted – optionally for additional 2-5 years.</p> <p>One carrier offers unlimited EOB.</p> <p>Contract may offer a guaranteed residual DB if base policy is used up for LTC - from 5% to 20%.</p> <p>Optional automatic LTC inflation increases available. May apply to all benefits or only to LTC EOB.</p> <p>Elimination Period set by contract – typically 0 to 90 days.</p>	<p>No option for LTC benefit inflation increases.</p> <p>Cash values or dividends may increase total LTC acceleration pool on a non-guaranteed basis.</p> <p>Elimination Period set by rider – typically 90 days.</p>	<p>No option for CI benefit inflation increases.</p> <p>Policy may pay the CI acceleration as annual lump-sum vs. month-to-month.</p> <p>Elimination Period set by rider – typically 90 days.</p>	<p>Policy may pay CI acceleration as annual lump-sum vs. month-to-month.</p> <p>No option for CI benefit inflation increases.</p> <p>Elimination Period set by rider – typically 90 days.</p>
